Equations

Consider

$$1 + 1 = 2(\#eq : ok2)$$

and suppose it is false!

This is a proof of theorem @ref(thm:foo)

I refer to it using Equation @ref(eq:ok2).

Here is an equation.

$$f(k) = \binom{n}{k} p^k (1-p)^{n-k} (\#eq : binom) \tag{1}$$

You may refer to using \@ref(eq:binom), like see Equation @ref(eq:binom).

Theorems and proofs

Labeled theorems can be referenced in text using \@ref(thm:tri), for example, check out this smart theorem @ref(thm:tri).

For a right triangle, if c denotes the *length* of the hypotenuse and a and b denote the lengths of the **other** two sides, we have

$$a^2 + b^2 = c^2$$

Callout blocks

The R Markdown Cookbook provides more help on how to use custom blocks to design your own callouts: <https://bookdown.org/yihui/rmarkdown-cookbook/custom-blocks.html>
